Unplayable because of resolution problem.. Great game, original and addictive. It requires a lot of skill, something I haven't got, but despite the frustration and the steep learning curve it makes me want to keep trying. Basically you have to create waves to catch orbs. You control the shape of the waves by moving your mouse. Each level gets a bit more complicated as obstacles appear. It's too good for its price, don't think it twice and buy it..
